

- Promoting Fair Trade and eco-friendly products
- Crafts from traditional workshops around the world
- Crafts from local artisans here in the Westcountry

HAND MADE LEATHER BAGS Crafted in Poland

Slon Torbalski is a brand of leather bags and handbags that has existed on the Polish market since 1997.

All parts of each handbag are cut and woven by hand – this is why our goods have a hand made certificate. Dealing with such a precious material as leather, our designers eagerly use its value to design useful odds and ends for everyday life.

ECO FRIENDLY

When we reach for leather we care not only for its best quality but also for its full productivity so we can protect natural environment. And to serve that purpose we developed strategy of balanced production called ecocycling strategy, which gives us possibility to choose and select leather imported from many production centers in the whole Europe.

Slon Torbalski has risen to distinction in Europe by being known for top quality. Our modern selling technology has allowed our bags to be available all over Europe and North America. The ultimate launch platforms for new products are the national and international fashion fairs and expositions. We have been invited to represent Kraków at International Fairs in Bordeaux and in Frankfurt am Main.

Our team is made up of masters of leatherwork who care about maintaining the highest quality standards of design and production for our handbags.

We do not use cookie cutter production methods. Our designers – Graduates from the Fine Art Academy in Kraków - infuse fresh young ideas into our collections.

Individuality is respected. That means, instead of you trying to keep up with the latest trends and fads, we keep up with you.

Bags Interiors -all have a zipped leather pocket -pocket for a mobile phone -key leash -pocket for pens -lining. Straps: are adjustable
